Personal Statement

Creative and efficient web developer, working on both front-end and back-end development. Recently developed a web application using Python and JavaScript that can replace the old and traditional NewsBaord used by originations to announce their news/events to their employees and customers. I have strong problem solving and good   communication skills, demonstrated through internships and personal projects.

Skills:

- ✓ Python and the Django framework
- ✓ JavaScript and React JS
- ✓ Node JS and Express
- ✓ Database engines such as MySQL and MongoDB
- ✓ Curiosity for learning
- ✓ Attention to details
- ✓ Creative Vision
- ✓ Good time management skill

Experience:

June 2021 - September 2022

Addis Media Network - four months internship experience.

Project - Web-Based NewsBoard Application.
